Container Accessories

Optimise your Pickerings storage space.

Office Desk

Canteen Table

Padded Chairs

Filing Cabinets

Lockable Cabinet

Polyprop Chairs

Furniture

We provide a wide choice of furniture you'll need to use every day for your portable offices, meeting rooms, canteens and changing rooms.

Furniture can be provided for any number of people whether you have a large or small workforce. Our standard furniture packs are designed to give you just what you need for every type of use so you won't have to think about it.

As soon as your Pickerings building is delivered and handed over you'll be ready to use it straight away. To help control cost and plan your finances you can either hire or buy from our large furniture range.

Container Racking

Maximise your storage space with our strong and sturdy container racking so you can safely stack items from floor to ceiling.

- Save on floor space while offering increased storage enabling you to store more items.
- Finding space and retrieving items will be so much easier.
- May reduce accidents with better organisation of storage items.
- Make storing of especially long items much easier to handle and store safely.

Container Lighting

Make your storage space lighter and safer with our choice of lights. Particularly useful for night-time working and during the winter months.

Fuel and Water Bowers

Temporary fuel and water storage solutions.

We can arrange to refill your water and fuel bowzers, on request.

Water Bowser

Providing the water required for toilets, washrooms and showers on a site with no mains connections can be a challenge. As part of our solutions, you can hire high-capacity water bowzers to supply all the non-drinking water your site needs.

Our Watermatics water bowser can solve the problem of no mains water supply. Details include:

- 1000 litre water tank (non-portable) encased within a secure steel shell.
- Provides a temporary water supply via a boostomatic on demand electric pump.
- Pipe fittings are protected by a thermostatically controlled electric tubular heater.

Fuel Bowser

Remote or greenfield sites often lack mains power and you'll need a generator to power your buildings. To supply the fuel required for your generator, Pickerings can provide a 950 litre U.N. approved bunded diesel fuel cube.

- Secure Lockable steel lid, gas strut assisted.
- Corrosion free inner Polyethylene tank; Corrosion free outer Polyethylene bund.
- Galvanised 5mm steel lightweight frame; Moulded-in trigger nozzle storage.
- Fork lift access from all sides; Four corner lifting eyes.
- Standard two generator supply connections can run with the lid locked.
- Stackable 2 cubes high when full or 3 high when empty.

Effluent Tanks

Safe and secure effluent storage and removal.

Safe and secure effluent holding tanks

If you have no mains drainage on site you'll need to consider how to store and dispose of waste water and effluent.

Our range of effluent tanks are purposely designed for the size and type of building you hire from us. The holding tank will retain all effluent and waste water until it needs to be emptied.

Safe effluent tank emptying service

We can offer safe, efficient emptying services for any effluent tanks you hire from us at frequencies to meet your needs. We'll arrange to dispose of your waste to Environment Agency regulations to give you complete peace of mind.

A fresh non-drinking water replenishment service is also available.

Staircases, Steps and Ramps

Purposely designed access and egress solutions.

Safe entrances and exits from your Pickerings building can be provided by our range of purposely designed solutions to meet your specific needs. For restricted sites with the need to install buildings to two or three storeys our external staircases are a popular choice.

- Our range includes:
- Steel staircase for anti-vandal steel cabins and modular buildings.
 - Three storey pod with extra wide landings and dogleg staircases for a larger complex.
 - Specially designed double width landings to bridge two sets of buildings.
 - External ramps installed for the less mobile.
 - Steel steps with handrails for use with toilet block and effluent tank.
